

Kenya Success on SRI

Under the South-South Knowledge Exchange Programme by World Bank Institute during January 2010 I have trained 3 batches of Kenyan farmers at Mwea irrigation scheme. During the planting season (Aug – Dec 2010) 100 farmers adopted SRI. The preliminary yield increase recorded was between 7-8 t ha⁻¹ as compared to 5-5.5 t ha⁻¹ under Mwea irrigation scheme using Basmatie an aromatic rice variety.

The Kenyan also developed a planting frame by understanding the concept of square planting. Really appreciable. I feel proud to share among our members.

Thanking You & With Regards
